END FUEL POVERTY COALITION RESPONSE
16th January 2025**

The End Fuel Poverty Coalition is a [broad coalition of more than 70 anti-poverty, health, housing and environmental campaigners, charities, local authorities, trade unions and consumer organisations](#). It is also supported by academics, social enterprises and those working on the front line of fighting fuel poverty.

This consultation plays a vital role in reforming Britain's broken energy system. In 2025, we urge all policy makers to understand how their decisions can affect the affordability of energy bill, avoiding discriminatory pricing, delivering longer-term reforms that bring down the cost of energy and improving the energy efficiency of homes.

Some of our members have already responded individually to the consultation and the wider End Fuel Poverty Coalition membership wish to add their support to the views put forward by CSE as summarised below:

CSE supports ED3's approach to investing in network capacity ahead of need while considering long-term system costs. With the risks of under-investment now greater than over-investment, they advocate for a more proactive, directive "Plan and Deliver" approach to tackle connection delays. However, they stress that this should work alongside flexibility in network management. CSE also highlights fairness concerns, urging that DNOs should monitor and report on the distributional impacts of their services to ensure no one is left behind, especially vulnerable or non-fuel-poor households. They call for standardized, high-quality advice and improved delivery of social obligations to vulnerable customers.

We would be grateful if you could continue to keep the Coalition informed about developments in this consultation.
