

# Example Interim Smart Registration Process

## Electricity Registration Process

<b><i>Gaining Supplier</i></b>	<b><i>Comment</i></b>	<b><i>Agent</i></b>	<b><i>Comment</i></b>	<b><i>Interim Service Provider</i></b>	<b><i>Comment</i></b>
<i>Identify Smart Meter</i>	<i>Process Change New message required</i>			<i>Provide Smart Meter Status</i>	<i>May be provided by ECOES/SCOGES</i>
<i>Record Smart Status</i>	<i>Process Change</i>				
<i>Obtain Consumption Data</i>	<i>Optional</i>			<i>Provide Consumption data</i>	
<i>Register for Supply</i>	<i>Existing</i>				
<i>Appoint Agents</i>	<i>Can existing data flows be used e.g. Service levels to set smart status  Read frequency set to ensure no regular read visits undertaken by DC</i>	<i>Receive Appointment</i>	<i>New process - need to recognise Smart meter installed and possibly alternative obligations</i>		
		<i>Record Smart Meter</i>	<i>New process</i>		
<i>Receive Agent Responses</i>	<i>Existing</i>	<i>Send Appoint Confirmation Data</i>	<i>Existing</i>		
<i>Request Start Read</i>	<i>Process Change</i>			<i>Provide CoS Read</i>	<i>New process</i>
<i>Provide Read to DC</i>	<i>Existing process</i>	<i>Validate Read</i>	<i>Existing</i>		
<i>Receive validated CoS read</i>		<i>Provide validated read to Supplier</i>	<i>Existing</i>		
		<i>Provide read to old DC</i>	<i>Existing</i>		
<i>Issue Meter Configuration Request</i>	<i>Process Change New message?</i>			<i>Configure meter</i>	<i>New process</i>
<i>Receive configuration data</i>	<i>Process Change New message?</i>			<i>Provide Configuration details</i>	<i>New process</i>
<i>Notify MOP of updated details</i>	<i>New process</i>	<i>MOP Receives new configuration details</i>	<i>New process</i>		
<i>Request Smart Read Schedule</i>	<i>Process Change New message?</i>			<i>Apply Schedule</i>	<i>New process</i>

<b><i>Losing Supplier</i></b>	<b><i>Comment</i></b>	<b><i>Agent</i></b>	<b><i>Comment</i></b>	<b><i>Interim Service Provider</i></b>	<b><i>Comment</i></b>
<i>Receive Loss notification</i>	<i>Existing process</i>				
<i>Check Meter type</i>	<i>Process change</i>				
<i>Schedule final read</i>	<i>Process change New Message</i>			<i>Receive scheduled request</i>	<i>New process New message</i>
<i>Schedule data removal and config change</i>	<i>Process change New Message</i>			<i>Receive scheduled request</i>	<i>New process New message</i>
<i>On SSD</i>					
<i>Receive Read</i>	<i>Process change New Message</i>			<i>Provide read</i>	<i>New process New message</i>
<i>Receive confirmation of data removal and config change</i>	<i>Process change New Message</i>			<i>Clear data and reset config</i>	<i>New process New message</i>
<i>Receive validated COS read</i>	<i>Existing process</i>	<i>Provided validated CoS read</i>			

Legacy to Smart meter Exchange Electricity

<b>Supplier</b>	<b>Comment</b>	<b>Agent</b>	<b>Comment</b>	<b>Interim Service Provider</b>	<b>Comment</b>
<i>Identify Smart Meter</i>	<i>Process Change New message</i>			<i>Provide Smart Meter Status</i>	<i>New process New message</i>
<i>Provide meter details</i>	<i>Process Change New message – provided ahead of install</i>			<i>Receive Meter details</i>	<i>New process New message</i>
				<i>Populate head end with asset details</i>	<i>New process New message</i>
<i>Meter Self registers</i>					
				<i>Link Devices, Comms and Meter point data</i>	<i>New process New message</i>
<i>Receive MPAN/meter confirmation</i>	<i>Process change New message</i>			<i>Notify Supplier link made</i>	<i>New process New message</i>
<i>Receive asset and configuration data and read</i>	<i>Process change New message</i>			<i>Notify Supplier of asset and configuration and read</i>	<i>New process New message</i>
<i>Record Smart Status</i>	<i>Process change</i>				
<i>Issue Meter configuration Request</i>	<i>Process Change New message?</i>			<i>Configure meter</i>	<i>New process New message</i>
<i>Receive configuration data</i>	<i>Process Change New message?</i>			<i>Provide Configuration details</i>	<i>New process New message</i>
		<i>MOP Complete Job</i>	<i>Existing process</i>		
<i>Receive New meter config details</i>		<i>MOP Update Asset data and notify Supplier</i>	<i>Existing process</i>		
<i>Receive removed meter details</i>	<i>Existing process</i>				
<i>Receive Smart meter read</i>	<i>Existing process</i>	<i>DC Provides validated opening reads</i>	<i>Existing process</i>		
<i>Receive final meter read</i>	<i>Existing process</i>	<i>DC Provides closing reads</i>	<i>Existing process</i>		
<i>Provide additional asset details to MOP</i>	<i>Process Change New message</i>				
<i>Notify MOP of updated details</i>	<i>New process</i>	<i>MOP Receives new configuration details</i>
