Question	In the sample areas, do Tower Blocks have gas heating?		
Notes on question			
Answer	<p>Yes.</p> <p>We assume the definition of "tower block" to be a multiple dwelling unit building of 5 or more stories. For example, this is the definition used by the Green Alliance in their analysis entitled "Towering Ambitions: transforming high rise housing into sustainable homes"</p> <p>(<a href="http://www.green-alliance.org.uk/grea.aspx?id=6315">http://www.green-alliance.org.uk/grea.aspx?id=6315</a>).</p> <p>The London Borough of Tower Hamlets is the trial location of V-CEE and the customer pool for recruitment will include tenants from two social housing organisations, Poplar HARCA and Tower Hamlets Homes. The statistics for tower blocks that have gas heating has been collated for each of these organisations.</p> <p><i>Tower Hamlets Homes</i></p> <p>Of the 132 Tower Hamlet's Homes buildings of 5 or more stories, 79.5% of homes (representing 4,987 flats) have individual gas service. Overall, Tower Hamlets Homes manages 15,170 flats and and V-CEE trial participants will be drawn from this total pool of tenants (including those in multiple dwelling unit</p>		

	<p>buildings of 4 or fewer floors).</p> <p><i>Poplar HARCA</i></p> <p>Of the 85 Poplar HARCA buildings of 5 or more stories, 79.15% of homes (representing 3,353 flats) have individual gas service.</p> <p>Overall, 83.5% of the Poplar HARCA total of 7,086 tenant properties have gas heating (individual gas boilers), and V-CEE trial participants will be drawn from this total pool of tenants (including those in multiple dwelling unit buildings of 4 or fewer floors).</p>
